**FIT** is a high-impact design that helps you fit just about any text into just about any space. To accomplish this task, Fit comes in an expansive range of widths; beginning with the impossibly narrow Skyline, each character grows by 3600% (on average) to reach the gargantuan Ultra Extended. In between these extremes, you will find a family rich in panache and expressive potential. Fit is one of the first typefaces to ship as an OpenType Variable Font, uniting its many widths into a single, fittable font.

#### Available Formats:

**Desktop**      OpenType CFF (OTF)  
**Web**            WOFF, WOFF2  
**App/E-book**    OpenType TrueType (TTF)

**Designer:** David Jonathan Ross, 2017

DJR draws letters of all shapes and sizes for custom and retail typeface designs. A native of Los Angeles, He began drawing typefaces at Hampshire College and joined The Font Bureau in 2007 where he honed his bézier-wrangling skills. Now he publishes visually imaginative and technically advanced designs at his own foundry, including Fit, Manicotti, Input, Gimlet, and Bungee. You'll find him in Western Massachusetts with his partner Emily and their two dogs, Sophie and Lily.
